Project: design a bathroom for peer

Project: design a mid-century modern living room

Project: design your dream bedroom

Project: design a universal bathroom in a residential home

Marshall Commercial Project

design concept statement

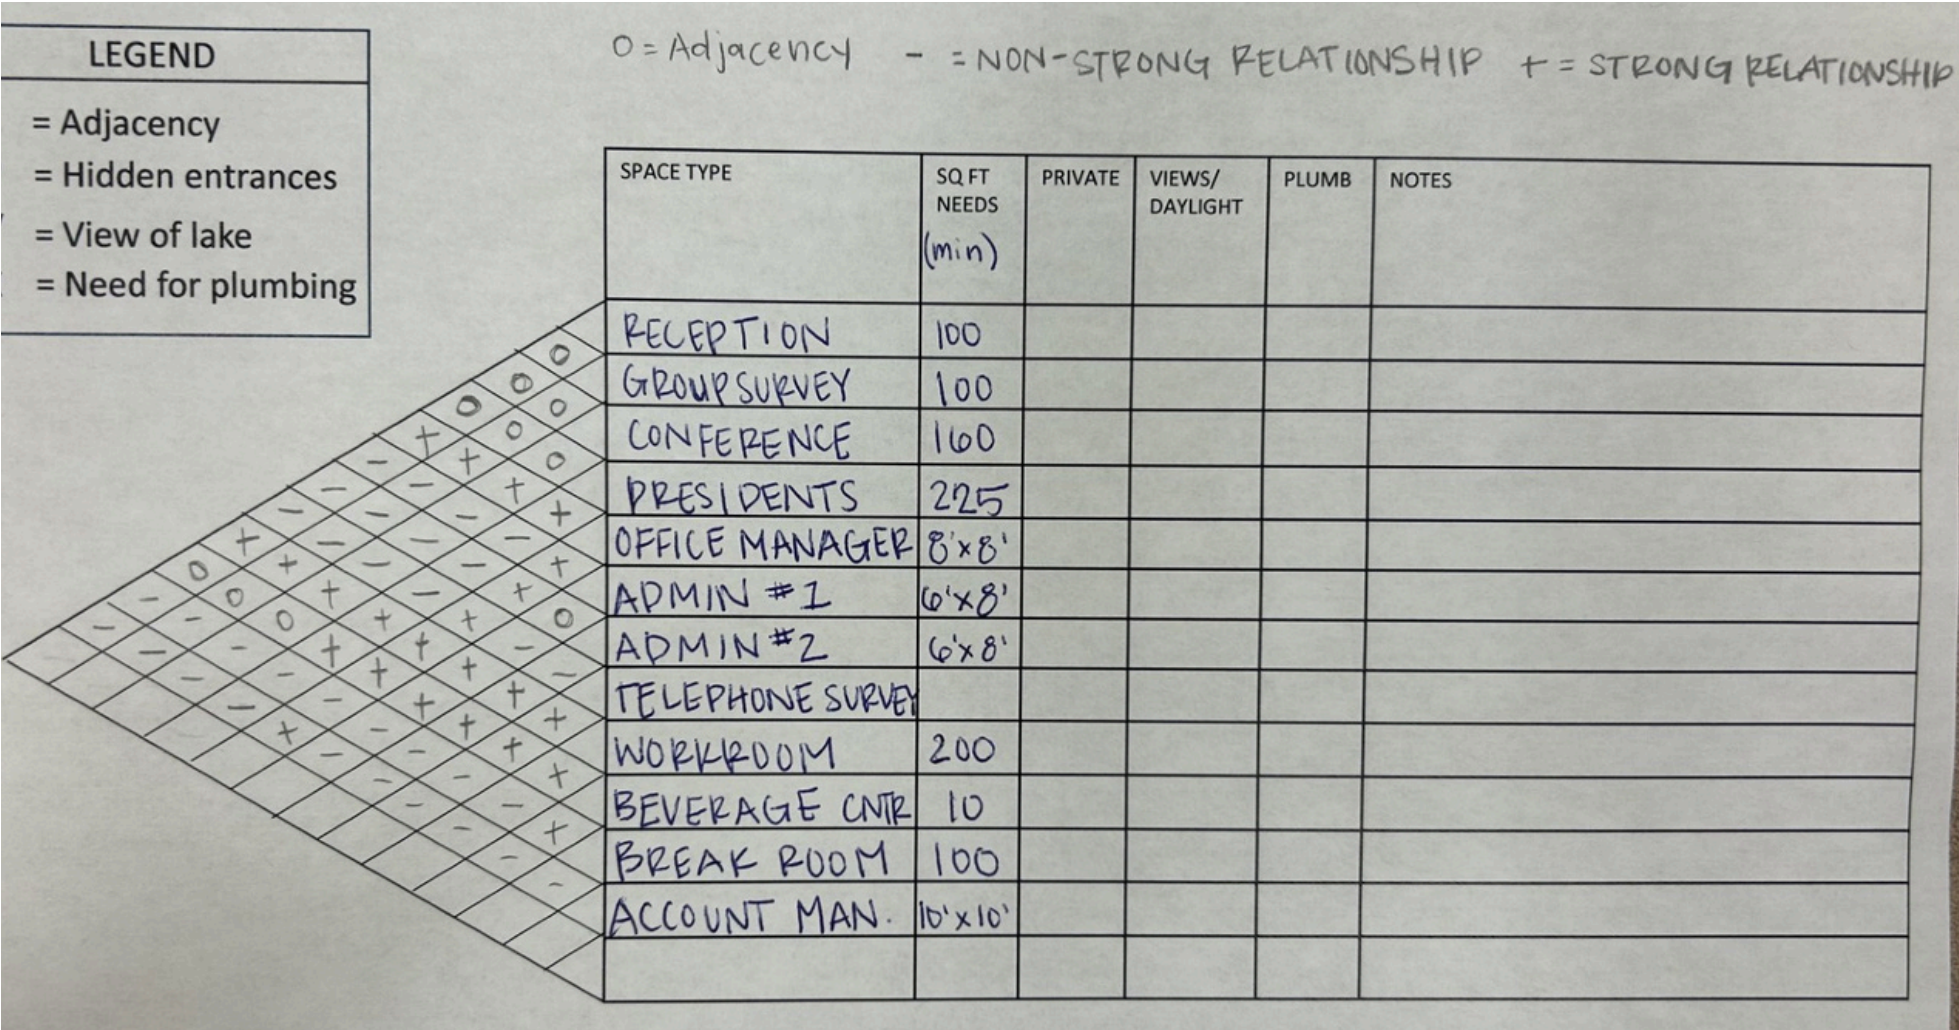

The Marshall Research Group office blends a moody, focused vibe with an open, easy-to-collaborate layout. Darker tones, soft lighting, and textured materials help create a calm space for work, while open areas and clear sightlines make it easy for people to connect and share ideas. It's a workspace designed to feel naturally collaborative—perfect for research that needs focus and team-driven creativity.

Chester Residential Project

design concept statement

Thoughtfully designed residence that blends contemporary style with an eclectic vibe, creating a home that feels both expressive and refined. Rooted in a love for music and entertaining, the layout is carefully designed to flow naturally between comfortable social areas and intimate retreats, offering the perfect balance. Layered textures, curated artwork, and modern finishes come together to reflect individuality while maintaining a sense of balance and warmth. Every detail is intentional — from acoustically attuned spaces that invite performance and conversation to quiet corners designed for relaxing.

Orlando Vacation Home

Lighting Selections

French Country Design Style Assigned

design statement

Blends the charm of the French countryside with the breezy ease of coastal Florida living. The lighting moves with the rhythm of the day—soft, sunlit mornings, relaxed afternoon brightness, and warm, golden evenings that invite relaxation and comfort. Fixtures in natural materials like linen, rattan, and weathered brass bring texture and warmth, while subtle dimming and layered light create a cozy, lived-in feel. The result is a home that feels effortlessly elegant, relaxed, and perfectly balanced between rustic french and beachside calm.
